

Apex International Airport - CCP

1. Risk Inventory/Assessment

Airports potentially face a wide range of crises, but not all risks have the same probability or impact. To prepare effectively, Apex International Airport has identified three major risks: severe weather disruption, aircraft accidents or runway incidents, and cybersecurity breaches. Each has been rated based on Fern-Banks' scale.

The chart below visually represents these risks. Severe weather is the most likely with a high impact, reflecting on the airport's exposure to weather incidents and other events that delay air travel. Aircraft accidents are less likely, but they have the highest impact, making them a critical but low-probability risk. Cybersecurity breaches are moderately likely but can disrupt operations and lead to damage to the public's trust if sensitive data or systems are compromised.

2. Holding Statements

Scenario 1: Severe Weather Disruption:

At approximately [time] today [day/date], Apex International Airport began experiencing significant weather impacts, including [type of weather impact(s)]. In response, we have activated our Emergency Operations Plan, and we are working with airlines, the FAA, and any other necessary stakeholders to ensure passenger and employee safety. This situation is ongoing, but our priority is protecting the safety of travelers and staff. More information will be provided as it becomes available.

Scenario 2: Cybersecurity Breach:

At approximately [time] today, [day/date], Apex International Airport identified a cybersecurity incident affecting [system, ticketing, etc.]. Our IT and security teams immediately activated the airport's Emergency Response Plan and are working with federal authorities and cybersecurity specialists to investigate and contain the issue. At this time, [level of] operations continue, and we are focused on protecting the integrity of our systems and the information of our passengers. Updates will be provided as soon as more information is confirmed.

3. **Crisis Management Team (CMT)**

- President/CEO of AIA
- PR/Comm Director (me) as Spokesperson
- Chief of Operations
- Director of Security
- Director of IT
- Director of Human Resources

4. **Key Stakeholders:**

- Airline Partners (Delta, United, American, etc.)
- Pilots and flight crews
- Federal Aviation Administration
- National Transportation Safety Board
- Stores in the airport (restaurants, souvenir shops, etc.)
- Local emergency services
- Ground transportation partners (e.g., shuttles, trains, taxis)

5. **Social Media Guidelines**

- Clearly distinguish personal opinions from official AIA communications; if identifying yourself as an employee, include a disclaimer that your views are your own and don't represent the airport.
- Obtain proper approval before posting on any official airport accounts or pages.
- Uphold all applicable laws, including those related to privacy and copyright.
- Respect passenger and coworker privacy by never posting photos, videos, or details that could identify them without their permission.
- Don't share any unverified information about airport operations, security incidents, or emergencies. Only official AIA channels should release such updates.
- During a crisis, direct any media or public inquiries to AIA's Communications team; do not respond personally on social media.
